- ✓ **Tank Scheduling:** Ditch the whiteboard. Optimize your brew schedule, tank usage, & projections. It's at your fingertips. Anytime. Anywhere.
- ✓ **Raw Materials:** Track ingredient availability for grains, hops, and adjuncts, while evaluating losses, and analyzing lot traceability.
- ✓ **Yeast:** Is your yeast healthy to be able to brew? Create yeast genealogy trees to track yeast that is new, pitched, harvested, and propagated.
- ✓ **Process:** Tired of inefficiencies from paper logs, spreadsheets, or multiple systems of information? Track all Brew, Ferment, Filter, BBT, Package, Yeast data. From any device. All in one place.
- ✓ **Barrel Aging:** Track all cask data individually with beer, adjuncts, and microflora additions. Then, view notes and historical reports to see what happened in every cask that lead to that magical barrel aged blend!
- ✓ **Bottles, Cans, Kegs:** Do you have the right inventory to package what you need? Track depletions and losses for bottles, cans, and kegs to know what you always have on hand!
- ✓ **Packaging Lines:** Are you experiencing packaging downtime woes? Know exactly which packaging machines are stealing your minutes and efficiency.
- ✓ **Sensory:** Ensure the quality of your beer is consistent across batches by rating the beer on any sensory attribute and see it on a flavor wheel!
- ✓ **Distribution:** Which of your accounts are the hottest and which are slowing down? Run analytic reports on accounts by sales orders, price sheets, and account information.
- ✓ **Keg Tracking:** Know the history of everything in a specific keg and track individual keg locations using keg specific numbers!
- ✓ **Charts:** Are your daily gravities, temperatures, and overall times on par? Recognize issues before they become problems by graphing all process data.
- ✓ **Notifications:** Subscribe to real-time text and email alerts to keep you updated & aware of everything happening at your brewery!
- ✓ **Costs:** Want to see how much that batch of beer cost? Run reports on losses, efficiencies, and batch specific overhead.
- ✓ **Dashboard:** See all of your data in one place! Brew-Filter-Pack-SHIP Analytics & Instant brewery tank snapshots from anywhere in the world.
- ✓ **Batch History:** Did that last batch taste kind of funny? Easily reference full histories for batch comparison, from grain-to-glass.
- ✓ **Reports:** Calculate Brewer's Report of Operations and Australian Excise Tax in 2-clicks!
- ✓ **Contact Manager:** Track your relationships with accounts, vendors, and distributors. Record notes, actions and metrics.
- ✓ **Xero:** Sync Beer30 with Xero for contacts, sales orders / tax invoices, and purchase orders.
