BEER30 CORE MODULES

DASHBOARD: Need to see your data in one place? Instant brewery FV and BBT snapshots from anywhere in the world.

BREW PROCESS: Tired of the paper logs or multiple systems of information? Use your smartphone to track all Brew, Ferment, Filter, BBT, Package, Yeast data.

MAPS: Which retail accounts currently have your kegs? Let Google Maps show you!

INVENTORY: When was the last time you tried brewing and didn't have ingredients on-hand? Now, you will always know what's on your shelf.

REAL-TIME TEXTS AND EMAILS: Want to know what just happened at your brewery? Get raw data at your fingertips to give you peace of mind.

SENSORY: Do you have the best taste buds at your brewery? Confirm it! Have employees rate your beer on a flavor wheel.

CHARTS: Are your daily gravities and overall times on par? Recognize issues before they become problems by graphing all process data.

REPORTS: Did that batch taste kind of funny? Easily reference full histories for batch comparison, from grain-to-glass.

BEER30 PREMIUM MODULES

PACKAGING LINES: Packaging downtime woes? Now, you can know exactly which packaging machines are stealing your minutes...

FIELD QUALITY: Are you nervous about your latest R+D beer? Have customers and accounts rate your beer directly!
